

S10 Model

The new NID MINI MOGUL is a modular range of starch moulding machines for the confectionery and nutraceutical industries.

Depending on the customer's requirements, the NID MINI MOGUL may be configured in five different ways.

Each additional module offers a greater degree of automation.

It is suitable for research and development, small scale and up to full-scale high-capacity production outputs at a lower capital expense with less energy consumption.

FEATURES

Touch screen HMI

Robust State-of-the-art modular printer table design

Full stainless steel construction

New spinal drive tray movement design

Driven by servo motors

Construction in accordance to CE & UL standards

NID renowned pump design

Printer Table

Pump & Hoppers

BENEFITS

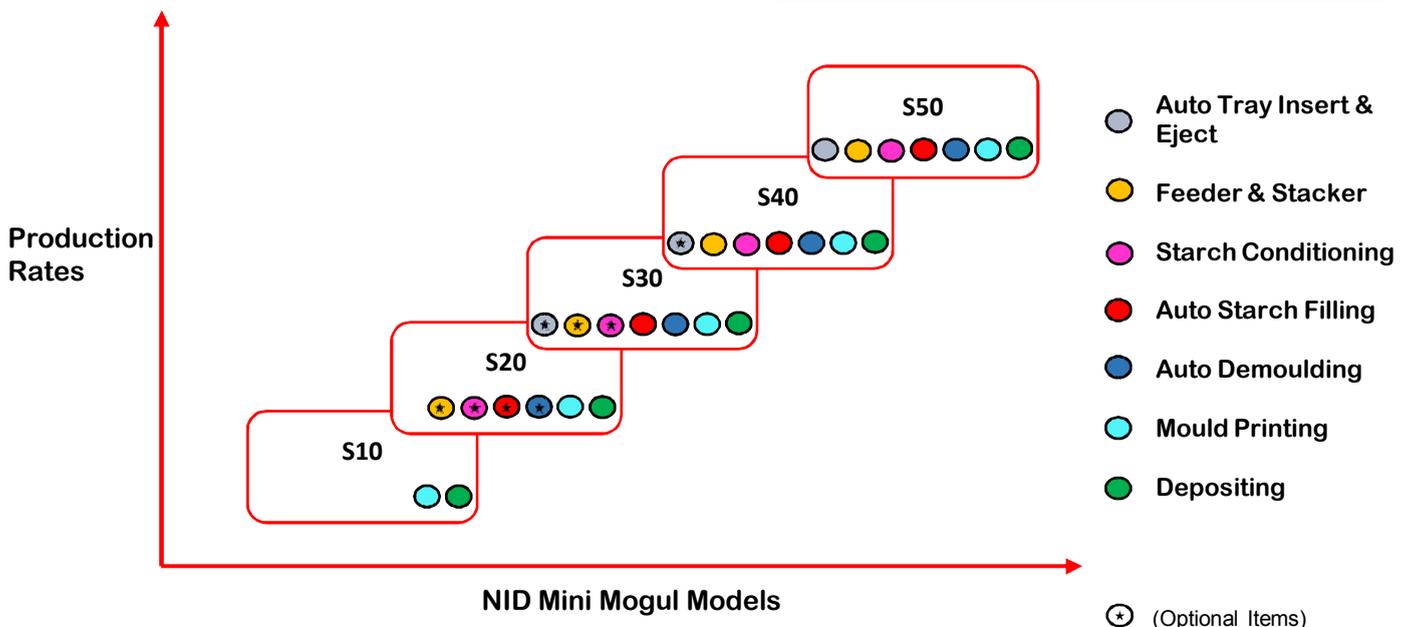

Central wash down tray drain for effortless cleaning.

Precision hopper heating for shorter curing time due to higher solid percentage depositing

Easy to clean hoppers for quick turn-over and hygiene.

Lower energy consumption as reduced utilities are required

Improved tray control and positioning from the spinal drive
